

Medical Dressing Packaging Machine

Medical dressing packaging machine is a fully automatic model for making different size of wound dressing pad for medical use in surgical. Medical dressing paste, surgical wound dressing pad, gauze pad, electrode pad, ecg dots etc.

PPD-MD model adopts servo technology as the core and combines advanced microprocessors. The whole operation is controlled by the PLC program.

Features:

1. Using imported materials, high-speed roller cutter. The continuous operation mode of the machine is fast and stable.
2. all in one automatic production process: the adhesive tape, absorbent pad, release paper, release paper and other automatic stripping, paste, composite, cutting, roll cutting, and finally automatically bagging and packaging.

Process flow:

Adhesive tape→absorbent pad roll cutting and pasting→isolating paper1.2 compound→roll forming→bag sealing→bag cutting→output packaged product (automatic counting)

The main technical parameters:

Application specifications: Reference 200x100mm
 Bag Specifications: Reference 250x150mm
 Base tape specifications: $\Phi \leq 400\text{mm}$, width $\leq 220\text{mm}$, paper core diameter 76.2mm
 Processing capacity: 50-100 bags/minute (1 tablet per bag)
 [Remarks: Non-packing production speed: 100-260/min]
 Total power: 220V, 50HZ, 6KW
 Equipment weight: 650 kg
 Dimensions: Length 3500×width 900×height 1800mm
 Packing size: 2200 × 1400 × 1600mm
